Drain hook screw (A2 stainless steel) for wood stud

V/S/B®
VÄSTSVENSK BYGGSKRUV AB

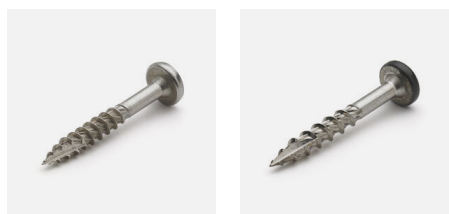

Function: Sharp tip and threads adapted for anchoring in wood. The threads immediately grip and tighten the screw into the wood stud. Suitable for assembly where a pan head is required, e.g. for drain hooks or other fittings externally. The unique tightening features of the screw have been achieved by providing the screw with a cutting drill tip, as well as with oblique and longitudinal flanks between the threads. This provides the following benefits:

- Less risk of cracks in wood.
- Lower torque when tightening.
- Less screwing time.

Track type bit: Pozidrive 2.

Material: Stainless steel (A2).
